About

Andy is the Head of Ecosystem for Sub-Saharan Africa at Google.

Andy's early startup experience includes inventing and launching Live365.com in 1999, which grew exponentially after launch to become the Internet's second-largest broadcaster with over 2.7 million annual tuning hours. More recently, Andy was the VP of Apps & Developer Relations for Mxit, the groundbreaking South Africa-based mobile messaging platform and social network.

He has led a range of pioneering online products over the last 15 years, including co-creating the Media RSS / mRSS standard (popularly used as the global standard for including multimedia in RSS feeds), leading products at Yahoo! (digital music, video-on-demand, company-wide video player platform, and video search), LOYAL3 (direct-to-consumer company stock purchasing via Facebook), Kongregate (social gaming destination and community site for gamers and game developer), and Scour.com (Internet broadcasting and peer-to-peer technology).

Andy is also the founder of Downtempo, an Internet product development & strategy firm located in San Francisco, whose client projects have included work for MTV, NASA, Craigslist Foundation, SpotXchange, LACMA, and Globe.gov. In addition to these client projects, Downtempo incubated and launched its own in-house projects, including Is It Safe To Visit?, the world's first travel advisory search engine, Phone Genome, and NiceTips.

I lead Google's Ecosystem team for Sub-Saharan Africa, with team members on the ground in Google's offices in Kenya and Nigeria. My focus is on reaching top startups and developers through scalable, high-impact programs, focused on all stages of the developer lifecycle, from developers writing their first lines of code, to entrepreneurs launching their first startups and apps, and on to the most successful developers on the African continent.

Projects my team has led includes coordinating and managing scalable developer outreach and support programs across the region (including Google Developer Groups, Google Dev...

UX leader

January 6, 2014, Andy was senior
to Phil but didn't manage directly

Andy shows how product management should be done. He put his heart and soul into launching the new J2ME client at Mxit and worked the team up into a lather of enthusiasm and productivity. He gives 120% and that's on an off-day. He managed the product backlog with complete precision and insight. It was an ... [See more](#)
